also required then
HiveContext was the entry
point. With Spark 2.X this
ambiguity has been removed
and now we have one single
entry point called
SparkSession. However, it is
to be noted that all the
module-specific entry points
are still very much around
and have not been deprecated
yet.

Create a shaded jar with your Spark code and all of your dependencies (excluding Spark and Hadoop). When creating the shaded jar, you should relocate Guava as Accumulo uses a different version. The pom.xml in the Spark example is a good reference and can be used as a starting point for a Spark application.
