Microsoft Access Form Design - YouTube  
Microsoft Access can help you prepare printed documentation of your database's design, which you can use for offline reference and planning. Specifically, Access can help you print table relationships as depicted in the Relationship window, and can help you print the design characteristics of database objects, such as object properties.

Document and print your database design - Access

Access creates a form and displays it in Layout view. You can make design changes like adjusting the size of the text boxes to fit the data, if necessary. For more information, see the article on using the form tool. Create a blank form in Access. To create a form with no controls or preformatted elements: On the Create tab, click Blank Form.

Most client/server systems require you to  
use separate tools to build forms. With  
Access, you can create forms straight from  
within your database. In Access 2016, you  
have the option of creating a blank form  
from scratch, using the Form Wizard, or  
having Access automatically create a form  
from a table or query. Create a Form from a  
Table
